

HVRC CREATE – 3D View Keyboard Shortcuts

CREATE provides keyboard shortcuts that can enable you to work extremely efficiently when working with the 3D view. The most frequently used of these are grouped on the computer keyboard in such a way that you can, with a little practice, use the keyboard and mouse while looking at the screen. Editing-related shortcuts may only have an effect in the Layout Tool.

Toggle between selection and navigation:

Q (Select), W (Orbit), E (Fly), R (Rotate), T (Seek)

Toggle object locking: A (Lock position), S (Lock Rotation)
Trigger edit mode for the selected object (if parametric): D
Zoom to selection: F
Toggle Grid visibility: G
Toggle hide/show object: H

Toggle select policy and rotation policy options: Z (toggle) and X (rotation)
Toggle Snap to Grid: C (toggle)

Other Keys

Delete selected object: Delete
Temporary toggle selection/navigation: Shift (hold down)
Straighten view: Space
Multiple Selection: Hold Command key (Ctrl or ⌘) and click on object to toggle selection
Duplicate Selection: Hold Ctrl (Linux & Windows) or Alt (OSX) key and drag selection to duplicate

Camera Controls

On Linux and Windows use Ctrl key instead of ⌘.

⌘ alt 1	Previous Viewpoint
⌘ alt 2	Next Viewpoint
⌘ 1	Top
⌘ 2	Front
⌘ 3	Left
⌘ 4	Right
⌘ 5	Back
⌘ 6	Bottom
⌘ 7	Explore
⌘ alt F	Align with selection
⌘ shift F	Pan to selection

Layout Editing

These commands are available in the Layout Tool only.

⌘ Z	Undo
⌘ shift Z	Redo
⌘ C	Copy
⌘ V	Paste
⌘ D	Duplicate
⌘ G	Group
⌘ shift G	Ungroup
⌘ L	Link
⌘ shift L	Unlink
⌘ E	Show Editors
